SUMMARY STATEMENT

A lifelong learner with a growth mindset, strong soft skills and empathic approach. I specialize in web development projects that are scalable. My stack involves HTML, CSS, JS, React, Node.js, and I am eager to keep learning more programming languages and tools. I hope my work can contribute to create web apps which have a great impact in the tech industry. I am also a certified Scrum Master who applies Agile Methodologies in teamwork.

PROJECTS

A small reading club (Code First Girls / July 2024)

- An app to read book recommendations and borrow books. Developed with HTML, CSS and Javascript. We coded a carousel to check the books available, and the functionality to borrow them. When a book was borrowed, the "borrow" button changed its color.

Memory Game (Migracode / March - May 2024)

- Coded a 'colors memory game'. Developed with HTML, CSS and Javascript. We coded a table with 4 colors that are shown in a random order. We added sounds to show if the clicked color is the right or wrong one, and sounds at the end to show if the player won or lost the game.

Coders a bordo (Factoría F5 / April 2023)

- Responsive gamification app with Frontend and Backend for a more pedagogical and enjoyable Factoría F5 onboarding process for students. Developed with React, CSS, Styled Components, Typescript, MongoDB, NodeJS and Axios. The admin can edit the questions and add admins.

Bon Appétit, team project (Factoría F5 / February 2023)

- Responsive app for cooking lovers with Frontend and Backend with React, CSS, Tailwind, Typescript, MongoDB, Axios and NestJS. We created a RESTful API with HTTP methods: GET, POST, PUT and DELETE for users to create, edit and interact with their lists of recipes and contacts.

Frankenwheel of Doom, team project (Factoría F5 / December 2023)

- Responsive game with animation and music. Developed with HTML, CSS and Javascript. We created a list to add and delete candidates to sacrifice in the wheel of doom.

EDUCATION

Factoría F5 (850 hours Full Stack Bootcamp) 2022 - 2023

National University of Trujillo, Peru

B.A. in Education, Majored in Foreign Languages (1995 - 1999)

CERTIFICATIONS

- Scrum Master & Product Owner Certified by Scrum Manager
- CFG Javascript Course
- Coursera UX/UI Fundamentals
- Intro to Astro by Porsche Digital

SKILLS

- Critical thinking and growth mindset
- Self-motivated and hardworking
- Organization and team work
- Excellent communicator
- Lifelong learner
